# PATRON

PATRON is proprietary subscriber administration and network monitoring software by Network Manager.

PATRON software is intended for **FTTx, Docsis, VoIP** and **Wireless** operators.

PATRON besides subscriber (modem, ONT, client) identity verification, registration and configuration, performs efficient administration of users. Provides a lot of possibilities that makes clients managemant and administration very easy.

Automatic ONT configuration and **subscribers suspension, graphic monitoring view, package creating with different services, integration with billing softwares**... are just some of functionality that makes PATRON very efficient.
